## CHAPTER IV AREA AND POPULATION

### General notes

#### 1. Data were compiled on the basis of:

- 1) until 2009 – the results of the Population and Housing Census 2002, and since 2010 – on the basis of the Population and Housing Census 2011;
- 2) the estimates of the size and structure of the population in a gmina prepared using the **balance method**. Population balances are compiled for periods between censuses on the basis of the last census (with the exception of data for 2000-2001 and 2010 – see item 2), taking into account changes in a given period connected with vital statistics (births, deaths) and migration of the population (registering and cancelling registration for permanent residence from other gminas and from abroad for permanent residence and temporary stay) as well as address changes of the population due to changes in the administrative division;
- 3) the registers of the Ministry of Digital Affairs – on internal and international migration of population for permanent residence and temporary stay;
- 4) documentation of gminas regarding internal and international migration of population for temporary stay;
- 5) documentation of Civil Status Offices regarding registered marriages, births and deaths;
- 6) documentation of courts – regarding legally valid decisions in actions for separations and divorces.

**2. Data on population** (as of 30 VI and 31 XII) as well as demographic rates and indicators per 1000 population etc. were compiled on the basis:

- for 2000-2009 – of the results of the Population and Housing Census 2002 (for 2000-2001 by the administrative division valid as of 31 XII 2002; for remaining years – on administrative division in force at a given moment),
- for 2010-2017 – of the results of the Population and Housing Census 2011, for 2010 by the administrative division valid as of 31 XII 2011 (for remaining years – on administrative division in force at a given moment).

**3. The working age population** refers to males, aged 18-64, and females, aged 18-59. In this category the age groups of **mobility** (i.e. 18-44) and **non-mobility** (i.e. 45-64 for males and 45-59 for females) are distinguished. The **non-working age population** is defined as the **pre-working**

– 45-64 lata, kobiety – 45-59 lat. Przez ludność **w wieku nieprodukcyjnym** rozumie się ludność **w wieku przedprodukcyjnym**, tj. do 17 lat oraz ludność **w wieku poprodukcyjnym**, tj. mężczyźni – 65 lat i więcej, kobiety – 60 lat i więcej.

**4. Dane o ruchu naturalnym ludności** w podziale terytorialnym opracowano: małżeństwa – według miejsca zamieszkania męża przed ślubem, separacje – według miejsca zamieszkania osoby wnoszącej powództwo, rozwody – według miejsca zamieszkania osoby wnoszącej powództwo, urodzenia – według miejsca zamieszkania matki noworodka, zgony – według miejsca zamieszkania osoby zmarłej.

Dane o **małżeństwach** uwzględniają związki małżeńskie zawarte w formie przewidzianej prawem w urzędach stanu cywilnego. Na mocy ustawy z dnia 24 VII 1998 r. (Dz. U. Nr 117, poz. 757) w urzędach stanu cywilnego rejestrowane są także małżeństwa podlegające prawu wewnętrznemu kościoła lub związku wyznaniowego zawarte w obecności duchownego. Małżeństwo zawarte w tej formie podlega prawu polskiemu i pociąga za sobą takie same skutki cywilnoprawne, jak małżeństwo zawarte przed kierownikiem urzędu stanu cywilnego.

**Przyrost naturalny ludności** stanowi różnicę między liczbą urodzeń żywych i zgonów w danym okresie.

Przez **niemowlęta** rozumie się dzieci w wieku poniżej 1 roku.

Informacje o urodzeniach i zgonach (w tym zgonach niemowląt) prezentowane są według kryteriów definicji urodzenia i zgonu noworodka rekomendowanej przez Światową Organizację Zdrowia.

**5. Migracje wewnętrzne ludności** są to zmiany miejsca zamieszkania w kraju; prezentowane dane pochodzą z rejestru PESEL i w przypadku migracji na pobyt stały zostały opracowane na podstawie informacji ewidencyjnych gmin o zameldowaniu osób na pobyt stały.

Informacje te nie uwzględniają zmian adresu w obrębie tej samej gminy, z wyjątkiem gmin miejsko-wiejskich, dla których został zachowany podział na tereny miejskie i wiejskie.

**6. Migracje zagraniczne ludności** to przemieszczenia ludności związane ze zmianą kraju zamieszkania. Obowiązujące w Unii Europejskiej rozporządzenie (WE) nr 862/2007 Parlamentu Europejskiego i Rady z dnia 11 VII 2007 r. zawiera definicję migracji uwzględniającą zamierzony okres zamieszkiwania w innym kraju wynoszący co najmniej 12 miesięcy.

Dane pochodzące z rejestru PESEL zostały opracowane na podstawie informacji ewidencyjnych gmin o zameldowaniach/wymeldowaniach na pobyt stały.

**7. Współczynniki dotyczące ruchu naturalnego i migracji ludności** w podziale terytorialnym obliczono jako iloraz liczby faktów określonego rodzaju i liczby ludności (według stanu w dniu 30 VI).

**age population**, i.e., up to the age of 17 and the **post-working age population**, i.e., 65 and more for males and 60 and more for females.

**4. Data regarding the vital statistics of population** according to territorial division were compiled as follows: marriages – according to the husband's place of residence before the marriage, separations – according to the plaintiff's place of residence, divorces – according to the plaintiff's place of residence, births – according to the mother's place of residence, deaths – according to the place of residence of the deceased.

Data regarding **marriages** refer to marriages contracted in a form provided by law at the civil status offices. On the basis of the Act dated 24 VII 1998 (Journal of Laws, No. 117, item 757), all marriages are registered in local civil status offices in Poland, including those based on the internal law of the churches or the religious associations, contracted in the presence of a priest. Marriages contracted on the basis of the canon law are subject to the civil Polish laws and entail the same civil law consequences as marriages contracted in the local civil status offices.

**Natural increase of the population** means the difference between the number of live births and deaths in a given period.

**Infant** is a child under the age of 1.

Information on births and deaths (including infant deaths) is presented according to criteria of the definition of infant births and deaths recommended by the World Health Organization (WHO).

**5. Internal migration of the population** is understood as changes in the place of residence within the country; presented data come from the PESEL register and in case of migration for permanent residence was compiled on the basis of gmina documentation regarding the registration of persons for permanent residence.

This information does not include changes of address within the same gmina, with the exception of urban-rural gminas for which the division into urban and rural areas has been kept.

**6. International migration of the population** is understood as moves of the persons related to the change of country of residence. Regulation (EC) No. 862/2007 of the European Parliament and the Council of 11 VII 2007 contains definition of migration taking into account international period of residence in another country for at least 12 months.

Data come from the PESEL register and are compiled on the basis of gmina documentation regarding registration/deregistration for permanent residence.

**7. Rates concerning vital statistics and migration** of the population according to territorial division were calculated as the ratio of the number of defined events to the number of population (as of 30 VI).
